

CHARLES BAKER

Software Developer

Phone Number: (209) 278-9534
Email Address: cdbaker.dev@gmail.com

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, Java, Python, SQL, C, HTML, CSS
- **Frameworks/Libraries:** Next.js, React.js, React Native, OAuth, Mongoose
- **Additional Programs:** MongoDB, Docker, Git, Github Actions, GCP, Android Studio, Jira

EXPERIENCE

• Full Stack Developer August 2025 - Present Day

Everbetter Medicine, LLC

- **Microservices Implementation:** Used Typescript, Next.js, and MongoDB to expand a NATS system to implement features for thousands of users in a multi-tenant system.
- **AI Work Environment:** Created an internal tool to transition our UI development process from Figma to an AI-driven React system, cutting UI development cycles from days to hours.
- **CI/CD & Release Ownership:** Handled mobile app GitHub CI/CD DevOps for 48 engineers, 3 concurrent platform tenants, and 20+ app deployments.
- **Typescript Optimization:** Re-architected legacy Javascript features in Typescript. Reduced API call volume by over 50% for some features.
- **Distributed Service Implementation:** Used React-Native and Typescript to implement app features connected to a microservices backend.
- **OAuth Security:** Identified architectural gaps in mobile OAuth implementation, preventing medical data exposure for thousands of users.

• Freelance Developer March 2025 - Present Day

Self-Employed

- **React Site Development:** Built and deployed multiple websites using React, HTML/CSS, Framer, and WebFlow. Used Python to create tools allowing non-technical stakeholders to utilize AI web scraping, manage website content, and update datasets.
- **UI/UX Design & Prototyping:** Aligned site purpose and intended audience to UI/UX designs. Created prototypes using Figma.
- **Documentation:** Produced written and video documentation guiding for technical and non-technical maintainers.

• Technical Consultant January 2025 - March 2025

New Clear Energy USA, Inc.

- **Reclaimed ~3 hours of daily productivity:** Created calendar and email filtering workflows. Restructured email and file systems. Introduced and integrated AI task automation to the workflow.
- **Website Consulting:** Provided input on UI/UX designs, brand direction, technical infrastructure, and application architecture.

PROJECTS

• Indigenous Database (2023-2024)

Search and compile collections of Indigenous Literature resources for community educational purposes.

- Designed and deployed a **REST API** using MongoDB, Mongoose, and Express.js. Developed a frontend with React, Redux, & Bootstrap. Iteratively improved API efficiency, reducing **overhead data by ~80%** and **average query times from ~550 ms to ~250 ms** for all endpoints. Integrated a role-based access control system, user authentication, and an automated web-scraper to database pipeline.

EDUCATION

• B.S. Computer Science California Polytechnic State University, SLO

Relevant Courses:

- Software Development Workflows, Modern Web Development, Databases, Data Structures, Algorithms, Distributed Systems, Operating Systems, Machine Learning, Programming Languages, Computer Architecture
