

CHARLES BAKER

Software Developer

Phone Number: (209) 278-9534
Email Address: cdbaker.dev@gmail.com

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, Java, Python, Scala, SQL, C, HTML, CSS
- **Frameworks/Libraries:** Next.js, React.js, React Native, OAuth, Redux, MobX, Mongoose, Express.js
- **Additional Programs:** MongoDB, Docker, Git, Github Actions, Expo, Android Studio, Figma, Webflow, Jira

EXPERIENCE

- **Frontend Developer** *August 2025 - Present Day*
Everbetter Medicine, LLC
 - **CI/CD & Release Ownership:** Took responsibility for all mobile application CI/CD pipelines and pull request approvals. This included 30+ engineers, 3 concurrent platform variants, and 20+ app deployments.
 - **Feature Flow Optimization:** Iterated on and reworked legacy feature flows. Reduced API call volume by over 50% for some features.
 - **Distributed Service Implementation:** Implemented over 13 data services connecting API modules to MobX stores (caches) and connected 4 backend service clients.
 - **OAuth Security Safeguards:** Identified architectural gaps in planned mobile OAuth implementation, preventing token exposure within phones.
 - **End-to-End Feature Scoping:** Collaborated with backend engineers to define requirements and plan implementation for full-stack features.
 - **Agile Delivery:** Operated within weekly sprint cycles and bi-daily standups. Utilized Jira for task management.
- **Freelance Developer** *March 2025 - Present Day*
Self-Employed
 - **Site Development:** Built and deployed multiple websites using React, Framer, and Hostinger. Implemented **role-based access control**, an AI-integrated web scraper with **vectorized RAG storage preparation**, and a free CMS system allowing non-technical stakeholders to manage content independently and without cost.
 - **UI/UX Design & Prototyping:** Aligned site purpose and intended audience to **UI/UX designs**. Created prototypes using **Figma** and **Framer**.
 - **Documentation:** Produced written and video documentation guiding non-technical maintainers regarding content updates, 3rd-party service & hosting maintenance, handling form submissions & email lists, and SEO monitoring.
- **Technical Consultant** *January 2025 - March 2025*
New Clear Energy USA, Inc.
 - **Operational Workflow Overhaul:** Created calendar and email filtering workflows. Restructured email and file systems. Introduced and integrated AI task automation to the workflow. **Reclaimed ~3 hours of daily productivity.**
 - **Consulting:** Provided input on UI/UX designs, brand direction, technical infrastructure, and application architecture.

PROJECTS

- **Indigenous Database** - Search and compile collections of Indigenous Literature resources for community educational purposes.
 - Designed and deployed a **REST API** using MongoDB, Mongoose, and Express.js. Developed a frontend with React, Redux, & Bootstrap. Iteratively improved API efficiency, reducing **overhead data by ~80%** and **average query times from ~550 ms to ~250 ms** for all endpoints. Integrated a role-based access control system, user authentication, and an automated web-scraper to database pipeline.

EDUCATION

- **B.S. Computer Science** *California Polytechnic State University, SLO*
Relevant Courses:
 - Software Development Workflows, Web Development, Databases, Data Structures, Analysis of Algorithms, Distributed Systems, Operating Systems, Machine Learning, Programming Languages, Computer Architecture
